Education

Indore institute of science and technology — Indore, MP
Bachelor of technology in Computer Science, Grade:7.50 — *Sep 2024 – Sep 2028*

Bens Public School — Khandwa, MP
Class-XII, Grade:88.0 — *Aug. 2023 – May 2024*

Scholars Den Higher Secondary School — Khandwa, MP
Class-X, Grade:94.6 — *Aug. 2011 – May 2023*

Projects

GateMind | *Java, Spring boot, React, MySQL, Docker, MongoDb, Kafka, Redis*

- Developed a custom API Gateway to route and manage client requests across multiple backend services, providing a centralized entry point for APIs.
- Implemented request logging and analytics to capture API traffic, response status, latency, errors, and service-level activity.
- Designed an analytics service with MongoDB to store and query gateway logs for monitoring and operational insights.
- Implemented authentication and request validation to secure API access and control communication between clients and backend services.
- Designed the gateway architecture with scalability and fault-tolerance considerations, including rate limiting, retries, and circuit-breaking mechanisms.

Retrieva | *Spring boot, Java, Spring Security Maven, Github, Spring ai, Pinecone*

- Developed a Retrieval-Augmented Generation (RAG) application that enables users to ask natural-language questions about uploaded documents
- Implemented a document-processing pipeline to extract, chunk, and index document content for semantic retrieval
- Generated embeddings and stored them in a vector database to retrieve contextually relevant document sections
- Integrated an LLM with the retrieved context to generate grounded, document-aware responses to user queries
- Implemented conversational querying to allow users to interact with their documents through natural language

Ecommerce API | *Java, Spring boot, MySQL, Spring Data JPA, Hibernate, Spring Security*

- Developing a RESTful e-commerce backend supporting product, customer, cart, and order management workflows
- Implemented REST APIs for product management, cart operations, and order processing
- Implemented Spring Security-based authentication and authorization for securing protected API endpoints
- Implemented input validation and exception handling to provide consistent API responses and reliable request processing

Technical Skills

Languages: Java, C++, SQL
Frameworks: Spring Boot, Spring MVC, Spring AI, Spring Data JPA, Hibernate, Spring JDBC, Spring Security
Databases: MySQL, MongoDB, Redis
Cloud and DevOps: AWS, Docker
Developer Tools: Git, GitHub, IntelliJ IDEA, VS Code, Postman
System Design: HLD
Distributed Systems: Microservices, Apache Kafka

Certifications & Activities

- Selected as Google Student Ambassador
- Cisco Networking Certification
- Claude 101 Certification
- HackerRank Java (Intermediate) Certification
